

Formatting Text in HTML

Make text clearer, more meaningful, and visually expressive with HTML formatting tags.

Introduction

HTML allows you to format your text using different tags. These tags help make your content easier to read and visually appealing.

Bold Text

Use the `<b>` or `<strong>` tag to make text bold. `<strong>` also means the text is important, especially for screen readers and SEO.

```
<p>This is <b>bold</b> text.</p>
<p>This is <strong>important</strong> text.</p>
```

Italic Text

Use the `<i>` or `<em>` tag to italicize text. `<em>` gives extra emphasis and has meaning, especially for accessibility.

```
<p>This is <i>italic</i> text.</p>
<p>This is <em>emphasized</em> text.</p>
```

Underlined Text

Use the `<u>` tag to underline text.

```
<p>This is <u>underlined</u> text.</p>
```

Strikethrough Text

Use the `<s>` or `<del>` tag to show deleted or crossed-out text.

```
<p>This is <s>wrong</s> text.</p>
<p>Old price: <del>$100</del> New price: $80</p>
```

Superscript and Subscript

Use `<sup>` for superscript (above the line) and `<sub>` for subscript (below the line).

```
<p>Water is H<sub>2</sub>O.</p>
<p>E = mc<sup>2</sup></p>
```

Combining Formats

You can combine formatting tags to apply multiple text styles at the same time.

```
<p>This is <b><i>bold and italic</i></b> text.</p>
```

Summary of Formatting Tags

Tag	Purpose
	Bold (no meaning)
	Bold (important)
<i>	Italic (no meaning)
	Italic (emphasis)
<u>	Underline
<s>	Strikethrough
	Deleted text
<sub>	Subscript
<sup>	Superscript

Quick takeaway: HTML text-formatting tags can change presentation while some tags, such as **** and ****, also communicate meaning and emphasis.
